Scan Chart ASC

Chart Automation & Document Management

ScanChart ASC is a medical records automation software solution designed specifically for ASCs to reduce the time-consuming, manual work associated with managing patient charts. This simple, yet powerful solution automates chart preparation, storage, and retrieval without changing physician workflow.

Paper charts are preserved for physician use during the patient encounter. Post-operatively, digital charts are created through our barcode scanning technology which seamlessly integrates with our practice management system interface. A 2D barcode is printed on every form that corresponds to the patient name, date of service, form name, and page number. When charts are scanned, ScanChart ASC saves and auto-indexes each form.

ScanChart ASC Key Features

- Secure, HIPAA-compliant, and user-friendly web portal

- Comprehensive chart audit identifies missing forms

- Provides significant cost savings by eliminating pre-printed forms and remote storage/retrieval fees

- Scans AR documentation and invoices

- Proprietary HL7 interface with practice management system

- Works in conjunction with ScanChart CBO, our central billing office workflow automation solution

Surgical Notes

How will ScanChart ASC accelerate your revenue cycle?

- **On Demand Chart Printing**
  Our practice management system interface eliminates manual chart preparation and reduces sticky labeling. Charts are printed in just a few clicks through pre-defined chart packs.

- **Barcode Scanning Technology**
  A barcode is printed on every form allowing for easy one-touch scanning post-operatively into the ScanChart ASC system.

- **Instant Chart Retrieval**
  Charts can be accessed immediately, eliminating time-consuming manual searching and remote storage retrieval fees.

- **Customizable Forms**
  ScanChart ASC utilizes your ASC's forms and allows you to make edits and create new forms on the go, eliminating the expense of preprinted forms.

About Surgical Notes

Surgical Notes is a healthcare IT company dedicated to developing cutting-edge, innovative revenue cycle solutions for the ambulatory surgery center industry. By assimilating Surgical Notes' products and services, ASCs have access to an enterprise revenue cycle solution geared toward maximizing profitability, physician disbursements, and business office efficiency.
