

# ScanChart CBO

## Central Billing Office Workflow Automation

ScanChart CBO, designed specifically for the central billing office, is a workflow automation solution that functions with ScanChart ASC, our chart automation and document management solution. ScanChart CBO simplifies and expedites correspondence with ASCs to compile all of the necessary components of a billing packet.

With real-time communication and instant information and documentation sharing between the CBO and ASCs, communication delays and courier fees are significantly reduced. All billing documentation, including AR and AP documents and correspondence, is centralized and stored electronically, eliminating time-consuming searches and remote storage fees.

### ScanChart CBO Key Features

Works in conjunction with ScanChart ASC, our chart automation and documentation management solution

Eliminates courier, sorting, and distribution fees dramatically reducing operational expenses

Provides real-time communication with your ASCs

Accelerates the revenue cycle and streamlines central billing office operations

Centralizes all AR and AP documentation

Provides significant ROI in year one

## How will ScanChart CBO accelerate your revenue cycle?

- **Provides Real-Time Communications with ASCs**

User-friendly scanning technology allows both the CBO and ASCs to digitize and index billing documentation that can be accessed instantly by both parties, significantly reducing courier fees.

- **Centralizes Billing Documentation**

Billing documentation for numerous ASCs are digitized and saved in one application, allowing on demand retrieval and eliminating remote storage fees.

- **Expedites Billing and Invoicing Processes**

By allowing the CBO to have real-time delivery and communication with the ASCs, obtaining the right paperwork for the right facility is simplified and wasted hours waiting for information are virtually eliminated.

- **Document Management**

ScanChart ASC works in conjunction with ScanChart CBO and interfaces with ASC practice management systems. Chart preparation, storage, and retrieval are automated without changing physician workflow. Barcode scanning technology digitizes and stores patient records, eliminating chart storage and retrieval fees. ScanChart ASC utilizes the ASC's forms and allows customization and new form creation on the go, eliminating the expense of preprinted forms.

## About Surgical Notes

Surgical Notes is a healthcare IT company dedicated to developing cutting-edge, innovative revenue cycle solutions for the ambulatory surgery center industry. By assimilating Surgical Notes' products and services, ASCs have access to an enterprise revenue cycle solution geared toward maximizing profitability, physician disbursements, and business office efficiency.
